PERSONAL PROJECTS

Chat App

- Allows users to login to a number of chat rooms and message each other.
- Used React to create the app, CSS to style the app, and a Postgres database to store the users and messages.

Weather App

- Used a public weather api to allow the user to enter any city or country and display the average temperature and current weather conditions.
- Used React to create the app and CSS to design the app.

Contact App

- Allows the user to add, delete, and search through their contacts.
- Used React to create the app and CSS to design the app.

Pokedex

- Allows the user to keep track of what pokemon they have caught and also get further information on the pokemon such as weight and height.
- Used NextJS to create the app and Tailwind to design the app.
